SAFE AND SECURE

One of Mongolia's leading providers of security and infrastructure services and solutions

WRITTEN BY: **WILL DAYNES**
RESEARCH BY: **WILL KIRBY**

Since 2005, Tridum e-Security has been providing high quality services and solutions to all manner of industry fields including the finance, enterprise, telecommunications, transportation, logistics, mining and government sectors.

Today the company is recognised for offering information and communication systems security and professional network infrastructure services, as well as being an expert provider of planning, implementation and maintenance solutions that are linked to banking software and hardware.

Tridum e-Security boasts a workforce made up of qualified and experienced individuals, among them certified engineers who have graduated from both domestic and foreign universities, and have a track record of exchanging experience with specialists from the likes of Cisco, Thales, and many other well-known companies.

These employees are one of the primary reasons for the company's success and are fundamental to its ability to provide its clients with customised solutions. It also provides professional services in the form of network architect, architecture design, security and encryption product development and evaluation, information security, unified communications, a liaison centre, data centre, and application delivery and service management.

Tridum e-Security commits itself to guaranteeing stable network performance and excellent efficiency via best practice and advanced technologies so as to help customers to reduce operation costs.

The company's mission is to be a leading company that provides update information and technology with its customers on the basis of demand for aggregated solutions of information and communication, using revolutionary techniques.

For its part, Tridum e-Security has formed business and technical alliances with some of the world's leading providers of IT solutions such as Cisco Systems, Thales Group, Diebold Inc., Hewlett Packard (HP), Giesecke&Devrient. Therefore, the International Council of Electronic Commerce Consultants (EC-Council) has recognised Tridum e-Security LLC as an Accredited Training Centre in Mongolia.

Tridum e-Security possesses a long list of successful projects that have taken place across Mongolia on behalf of all manner of clients, from the Ministry of Nature, Environment and Tourism and the Information, Communication, Technology and Post Authority to Khan Bank, Mobicom Corporation and of course Oyu Tolgoi Co., LTD. For the latter, the company has completed projects including the supply and installation of network equipment, the configuration of various software platforms and the first two phases of IP phone development. **BE**
